

Capstone Project - The Battle of Neighborhoods

A .Introduction:

A.1. Description & Discussion of the Background

An entrepreneur wants to start a new Multi Cuisine Indian restaurant in **CHICAGO**. Since he believes that Chicago is one of the most densely populated Indian immigrant states in US. So He approaches a DataScientist for a suggestion where to start his business. (source from wikipedia)

Since being a Data Scientist we need to solve his problem and recommend the best neighborhood of Chicago to start his business.

A.2. Problem :

1. Finding all the Neighborhoods of Chicago.
2. Finding all the Neighborhoods with INDIAN Restaurants.
3. Finding all the Neighborhood with-out single INDIAN Restaurants.
4. Finding the best place and most visited INDIAN Restaurant.
5. Suggest best Neighborhood for starting business.

B. Data acquisition and cleaning:

Chicago is one of the largest metropolises in the USA, it has various Neighborhoods and various kinds of restaurants within its neighborhood, but in our scenario we only need INDIAN restaurants, so we take help of FourSquare API to accomplish our task.

For this project we need following data :

- ❑ First we need all the neighborhoods of Chicago along with their latitude and longitude coordinates.
 - **Data Source** : https://en.wikipedia.org/wiki/List_of_neighborhoods_in_Chicago
 - **Description**: Wikipedia has a list of Neighborhood of Chicago, we scrap it using python libraries and get its location coordinates using geopy.geocoder library in python.
- ❑ Indian restaurants in each Neighborhood of CHICAGO
 - **Data Source** : **FourSquare API**
 - **Description**: By using this API we will get all the venues in each neighborhood. We can filter this venues to grab only INDIAN restaurants

C. Methodology :

1. As every data science project has different phases involved in its life cycle.

This project also has different phases like

- Business problem
- Approach followed
- Requirements Gathering (Data collection)
- Modeling and evaluation

C.1: Business Problem

This is already stated in the Introduction part (refer it)

C.2 : Approach Followed

We consider some metrics to solve this problem

1. Number of INDIAN restaurants in neighborhood
2. Distance of neighborhood from the center of the city
3. Is there any tourist places to visit

The optimal place to start business is a location where there are **less** INDIAN restaurants, **Minimum distance** from the center of city and there are some popular **tourist places** to visit.

C.3 : Requirement gathering (Data collection):

As mentioned in the Data acquisition section, we gather Data from wikipedia and Foursquare API.

→ Data from wikipedia that has all Neighborhoods of Chicago

	Neighborhood	Community area
0	Albany Park	Albany Park
1	Altgeld Gardens	Riverdale
2	Andersonville	Edgewater
3	Archer Heights	Archer Heights
4	Armour Square	Armour Square
...
241	Wildwood	Forest Glen
242	Woodlawn	Woodlawn
243	Wrightwood	Ashburn
244	Wrightwood Neighbors	Lincoln Park
245	Wrigleyville	Lake View

246 rows × 2 columns

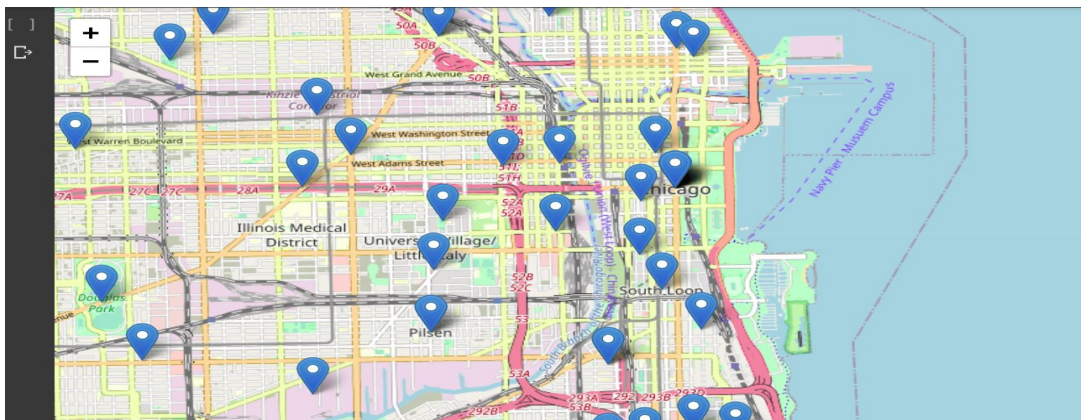

→ Assigning each Neighborhood its corresponding latitude using Geopy Library in python

	Name	Latitude	Longitude
0	Albany Park	41.971937	-87.716174
1	Altgeld Gardens	41.654864	-87.600446
2	Andersonville	41.977139	-87.669273
3	Archer Heights	41.811422	-87.726165
4	Armour Square	41.840033	-87.633107
...
226	Wicker Park	41.907802	-87.678155
227	Wildwood	42.004691	-87.775924
228	Woodlawn	41.779479	-87.599493
229	Wrightwood	41.748932	-87.703575
230	Wrigleyville	41.947022	-87.656477

231 rows × 3 columns

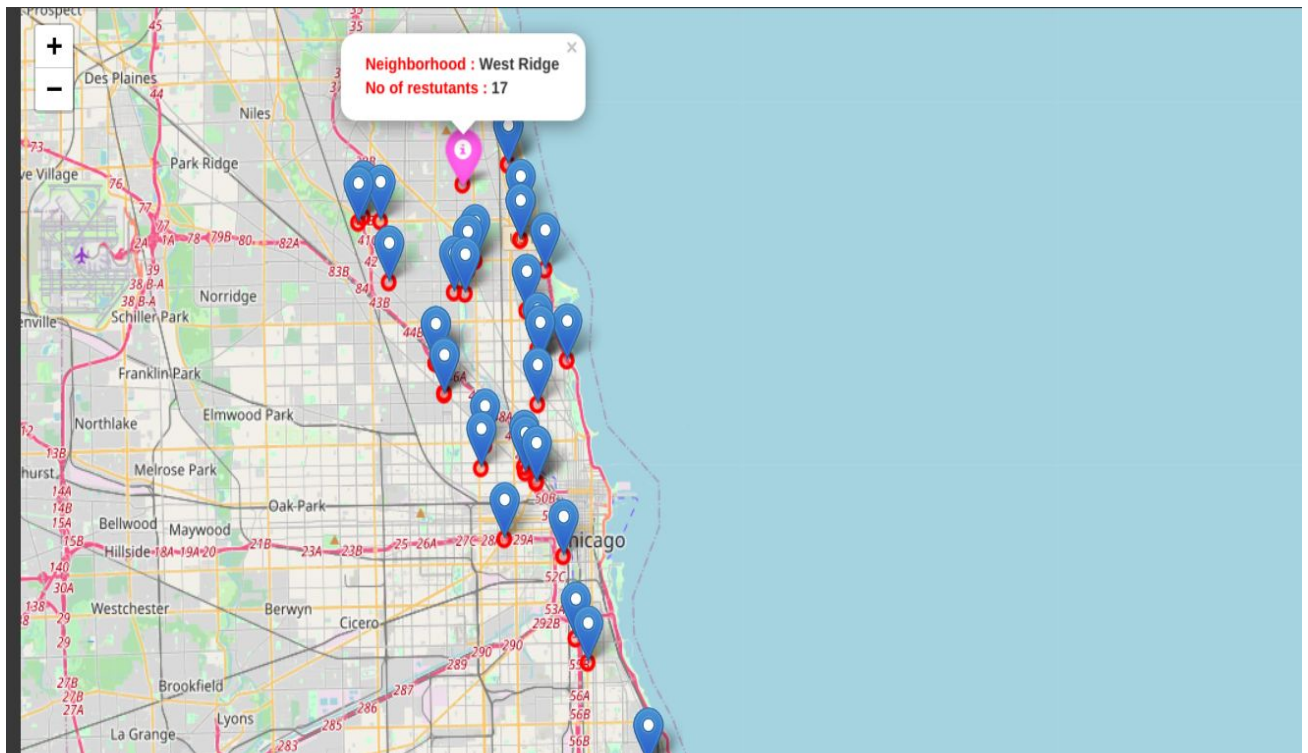

We use python library **Folium** to visualize these Neighborhoods.

We use FourSquare to get all the location where there are INDIAN restaurants

	Neighborhood	Id	Name_of_resturant
0	Armour Square	57205dd2498e101ee1162dbf	Obero's Indian Food
1	Avondale	5d2a84fc7cfbe00235364df	Superkhana International
2	Avondale Gardens	5d2a84fc7cfbe00235364df	Superkhana International
3	Belmont Central	562987d2498e027ba6c80810	Khyber Pass
4	Belmont Gardens	562987d2498e027ba6c80810	Khyber Pass
5	Belmont Terrace	562987d2498e027ba6c80810	Khyber Pass
6	Bowmanville	4b7ca417f964a5200b9f2fe3	Paprika
7	Bronzeville	57205dd2498e101ee1162dbf	Obero's Indian Food
8	East Hyde Park	4a592bdaf964a520dfb81fe3	Rajun Cajun
9	Edgewater	4b3c09dbf964a520cf8025e3	The Little India Restaurant
10	Edgewater Beach	4b3c09dbf964a520cf8025e3	The Little India Restaurant
11	Edgewater Glen	583f96e34c5312682f04d38b	Mango Pickle
12	Forest Glen	4fa83a75e4b0e4e84cb26830	Himshikhar Restaurant
13	Graceland West	52f80e32498e677d6a1b6424	Curry Point
14	Heart of Chicago	4fc96051e4b0e1bd1a22150f	Rangoli
15	Heart of Chicago	4c783985dbaa76b0fa28144b	Naveen's Cuisine
16	Hyde Park	4a592bdaf964a520dfb81fe3	Rajun Cajun

Visualization of the INDIAN Restaurants in CHICAGO

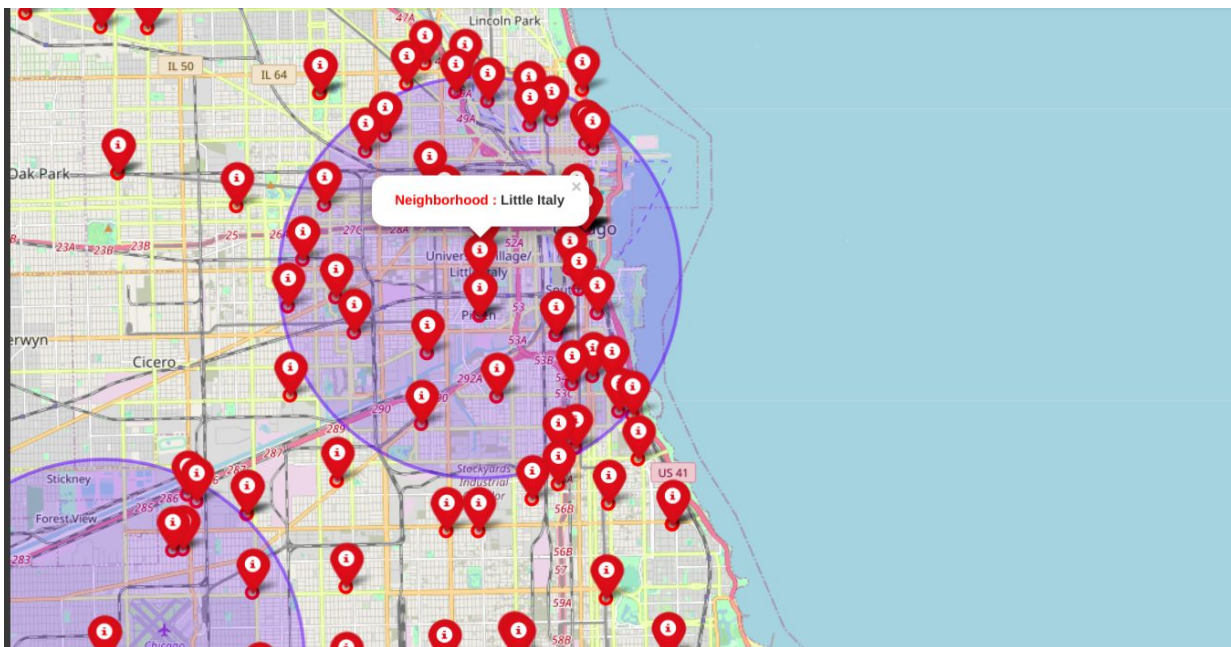

The pink marker show the Location where there are larger INDIAN Restaurants

Visualization of location where there is no INDIAN Restaurants

So we find the best location among them to suggest to our client

The circle Marker shows the neighborhoods that have tourist places, but there are no INDIAN restaurants over there.

So we suggest these locations to the client so he can start his business.

D. Conclusion :

1. Best place in CHICAGO to find INDIAN restaurant : **West Ridge** (it has 17 INDIAN restaurants)
2. Best restaurant in West Ridge to have dinner : **TAHOORA** (it has got 7.8 ratings and 49 likes)
3. Best place for entrepreneur to start business : **Little Italy,Lilydale,Clearing**
